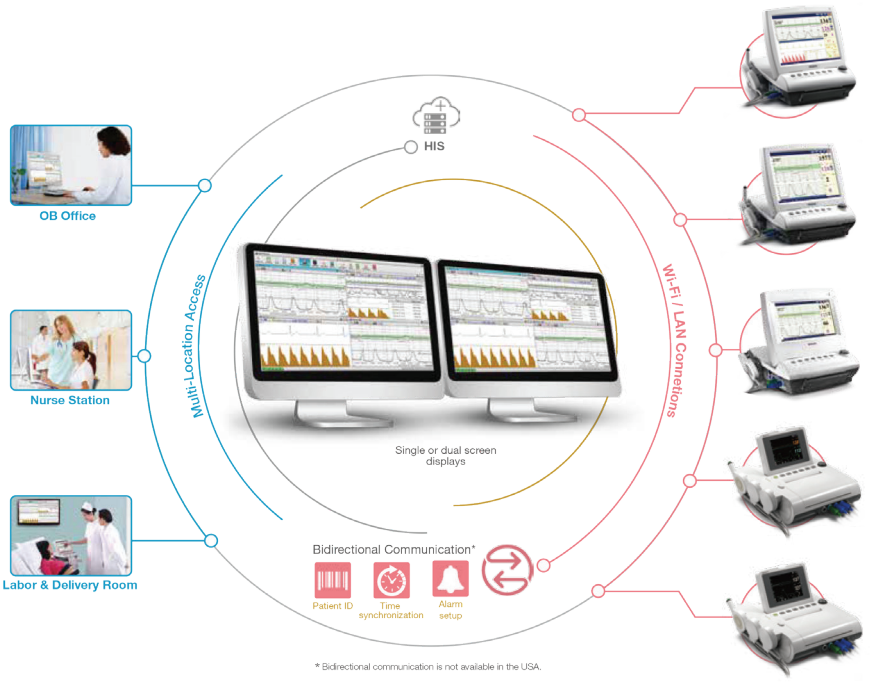
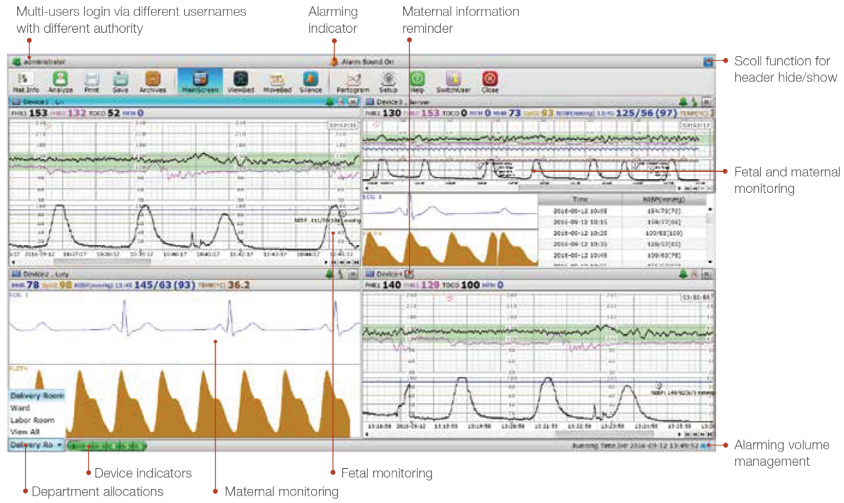
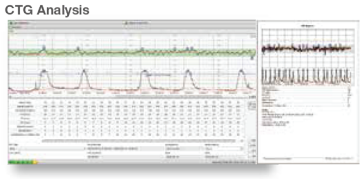
ES-MFM-CNS

Central Monitoring System

INTENSIVE CARES

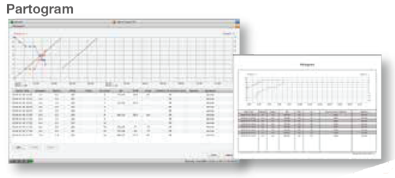






CTG Analysis

To assist diagnosing , diagnostic result can be saved in electronic format.



Partogram

To provide an accurate record of the progress in labor, so that any delays or deviations from normals can be presented immediately and treated accordingly.

ES-MFM-CNS is a comprehensive central nursing system for the obstetric cares. It is an integrated system that covers the entire continuum of obstetric care across the whole pregnancy stage from the first antepartum visit to post delivery care. The system displays data and information transmitted from fetal and maternal monitors and generates alerts for critical events. Easy access to well-organized information improves efficiency, allowing you to focus more attention on patients and achieve the best quality of care.

- Connection of up to 128 bedside fetal/maternal monitors
- Bi-directional communication of patient ID and alarming setup
- Time synchronization
- Built-in antepartum CTG & NICHD analysis function
- Up to 200 groups of NIBP data for each record
- Remote monitoring from different locations via CNS Client
- Supports for 32 people login at the same time
- Built-in partogram for labor stage management
- Export PDF&JPG format report
- Windows 10 Compatibility
